Radio Communications

Use the Correct Channel and Communicate Clearly

i24s

1 SELECT THE CHANNEL
Confirm the correct channel before starting work or moving to another area.

2 CHANGE CHANNEL
Use the selector or menu, then check the channel number on the display.

3 USE POS COMMS
Identify yourself, state your location and wait for a clear reply before proceeding.

4 SPEAK CLEARLY
Keep messages short, professional and easy to understand.

Site Radio Channels

- Mining Area C (SMAC) – Channel 26
- Shut Area C – Channel 28
- South Flank (SF) – Channel 37
- PC1 & PC2 – Channel 60

Before You Start...

- Check you are on the correct channel for your work area.
- Keep the radio on and volume high enough to hear calls clearly.
- Use Positive Communications when approaching cranes, machinery or restricted roads.
- If you are unsure how to change channels or use the radio, ask your Supervisor.

Check your channel, communicate clearly and always use Positive Communications.
